

Plug into 2.5 Mb of additional online storage.

FD-PC81 SINGLE DRIVE UNIT
FD-PC82 TWO DRIVE UNIT

The FD-PC8 is a new 8" double sided disk drive sub-system that adds an impressive 2.5 megabytes of online storage capacity to your IBM PC. Coupled with the 640 kilobyte capacity of the two 5¼" internal drives in your IBM PC, the system gives you enormous data base capability from the moment you plug it in!

IBM PC styling.

The FD-PC8 looks like your other IBM PC components. Same styling. Same color. Same dimensions. It stacks neatly under, on top of, or next to your IBM PC, and better still, is only one-half the height of standard 8" drives.

IBM PC and mainframe compatible.

Total interface capability with both IBM mainframes and PC affords new and unique data base flexibility and computing opportunities to the serious PC user.

Long life design features.

The FD-PC8 utilizes Shugart drives; the standard for quality and reliability in the computer industry. Unlike most disk drives, the motor runs only when selected, greatly increasing the life expectancy of the FD-PC8.
